2400 Harper Ave, Cincinnati OH 45212

Abdatykounta@gmail.com | (513) 304-7270

Available to Co-op in Summer 2027

EDUCATION

University of Cincinnati • Cincinnati, OH
Bachelor of Science, Computer Engineering

Graduation Date: May 2027
GPA: 2.8

SKILLS

Programming Languages	C#, Python, Java, SQL, Javascript, Visual Basic, C++, Matlab, Verilog, LABVIEW
Software Technologies	Git, Linux, Bash, Docker, GraphQL, Bootstrap, Vue.js
Computer & AI	Raspberry Pi, Soldering, Circuit Implementation, Microelectronics, Vivado, Multisim, Networking, Ollama, LM Studio, RAG, QLoRA

WORK EXPERIENCE

Meyer Tool Inc. Erlanger, KY

August 2023 – April 2025

Software Developer Co-op

- Redesigned 3 legacy Visual Basic applications into modern Vue.js web apps, improving maintainability and scalability through GraphQL and C# Entity Framework integration.
- Redeveloped 3 legacy applications from Visual Basic into a Vue.js web app
- Streamlined repository management using Git workflows, ensuring version control across collaborative projects
- Documented migration of 5+ legacy systems to a new database architecture, reducing dependency on outdated infrastructure

Software Developer Intern

August 2021 – August 2022

- Built an internal web application to centralize machine information, centralizing critical information for service techs
- Maintained and enhanced UI/UX for heavy-duty machinery systems, ensuring alignment with user workflows
- Integrated sensor data collection via Raspberry Pi and analog modules, supporting real-time validation of industrial operations

PERSONAL PROJECTS

Paperless-ngx (Tax/Immigration Office)

June 2026 – July 2026

- Installed a local AI-driven document classification system using to automate sorting of tax/immigration documents
- Implemented natural language processing (NLP) models to categorize 150+ document types, reducing manual sorting tasks and lookup time
- Integrated with existing workflows to enable automated routing of documents, improving efficiency in high-volume environments

Homelab

May 2025 – Present

- Built a NAS across 3 physical servers, hosting tools like Pi-Hole, Nextcloud, VPN, password managers, and torrent stacks for secure, scalable file management
- Optimized system performance through container orchestration and resource allocation, balancing multiple services on low-cost hardware.

Controller Joystick Sensor Replacement

July 2025

- Replaced joysticks with Hall effect sensors to enhance functionality in gaming hardware, resolving intermittent Bluetooth connectivity issues
- Conducted hardware diagnostics and repairs, ensuring long-term reliability for user devices

LEADERSHIP AND VOLUNTEER EXPERIENCES

University of Cincinnati Bearcat Electric Vehicle Team

September 2026 – Present

Electronics Team Member

- Collaborate with cross-functional teams to design low-voltage electrical systems for EV project
